

## **Technical Information.**

### CONTROL ROOM

The control room is a comfortable and spacious environment in which to work and has lots of natural light. The room measures 100 square metres.

### LIVE ROOM 1

This is an extremely large and flexible space of 170 square metres. It can easily accommodate a full band set up. The room can be left to have a very open and big sound, or with the use of high end acoustic screens and deadening curtains - can be made dry and tight sounding. Drums sound fantastic in this large wooden room, come and hear for yourself !

### LIVE ROOM 2

At 70 square metres, live room two is another great sized room. It feeds off from the control room making it perfect for overdubs and vocals.

### EQUIPMENT

#### Console

Custom built (Boutique), high end, 24 channel summing mixer.

#### Monitors

Yamaha NS10's, Adams S4A with Sub 24, PMC twotwo6.

#### Amplification
